## BEST TELEPRODUKTER AB

BEST develops and markets healthcare communications products. Established in 1979, the company specializes in Nurse Call and Attack alarms for the health care sector.

Today, BEST is a full-service provider of communication, integration and streamlining solutions for healthcare organizations. With holistic concepts and innovative technology that extends to hardware, software and apps for alarm management, task management, critical alarms, planning and statistics, countless possibilities open up for hospitals and senior living.

### Benefits

BESTmate is an app that turns the Spectralink phone into an efficient work tool for the staff at modern hospitals.

- Alarm management
- Task management
- Ward logistics
- Ward planner
- Service Call
- Secure messaging

### Versity unique features

BESTmate makes use of some of the unique features of the Versity phone.

- Native barcode scanning support for patient assignment
- Dedicated button for easy application access
- Dedicated button for Critical Alarm Accept
- Extended compatibility testing

### System Overview

The application is used together with our software platform BESTadapt, which is an overall integration and message platform mainly focused on Nurse-Call, Task management and ward Logistics.
