Spectralink 7502

spectralink

Stylish DECT Office Handset for Small and Medium-Sized Businesses

The Spectralink 7502 wireless DECT handset is elegant yet robust with features designed to increase user as well as business productivity for mobile workers in SOHO (Small Office / Home Office), and general office environments. The color display and the intuitive menu structure makes the handset a practical and preferred choice for mobile workers in general office environments across a range of businesses.

Business Benefits

Ease of use is key for any handset as without it the handset fails to be a valuable tool for the employee on the move. The Spectralink 7502 wireless DECT handset leverages an intuitive design – making it easy to use for any user.

With the Spectralink 7502 handset, employees benefit from increased productivity with easier and faster access to the information they need to perform their day-to-day tasks.

The 7502 is designed for easy one-hand operation for right-handed and left-handed people. It comfortably fits in the user's hands with easy access to all the keys – and allows for fast access of features using the two softkeys and the four-way navigation keys. Finally, it has all the main user features easily available under the on-screen menu.

The Spectralink 7502 handset is certified and tested with market-leading Call Control and Unified Communications (UC) platforms.

- Easy battery change
- Battery lifetime under proper charge and discharge conditions: two years or 500 charging cycles

Operating Temperature

- Incl. charging: 32° F - 104° F (0 - 40° C)

Complete your Spectralink DECT Solution

Optimize your Spectralink DECT Solution with AMIE® Advanced for IP-DECT

A cloud-based solution management platform for IT and Telecommunication Administrators to monitor IP-DECT servers, base stations, and handsets. AMIE Advanced for IP-DECT provides centralized provisioning, detailed analytics of system performance, automated and scheduled tasks, and proactive alerts when the infrastructure needs attention.

Protect and enhance the value of your Spectralink mobility solution with Software Assurance

Spectralink Software Assurance is specifically designed to complement and protect your existing Spectralink DECT solution. Software Assurance entitles you to all available software upgrades, including new features, service updates and security enhancements to mitigate the risk of data loss/breach over your subscription period.

De-risk your investment with Spectralink Professional Services

Design	Deploy
Strategize your path to success. We analyze and assess your needs based on your business goals, end-user requirements, and existing IT infrastructure to start the process. Then we work with you to map out an effective strategy that brings together the right combination of mobile devices, applications, and technology.	Align and activate your solution. We help put your plan into action with a thorough implementation process that includes configuring, implementing, and testing all aspects of your technical environment. We also provide comprehensive training to help prepare and position your employees for mobile success.

About Spectralink

As an award winner in mobile technology, Spectralink has been transforming the way our customers work and communicate for 30 years. Through our determination to do extraordinary things, we enable mobile workforces and empower our customers and partners to explore what's next, what's possible. With our enterprise grade, best-in-class mobile solutions, we are with our customers wherever they work, however they need us. Our people, commitment to innovation and our passion are our foundation for success.
