# Centralized Administration and Performance Monitoring for IP-DECT

INTELLIGENCE THAT PROVIDES CLEAR VISIBILITY INTO ASSET PERFORMANCE -  
TURN SYSTEM DATA INTO ACTIONABLE INSIGHTS.

## Operational Transparency Resolve system issues before they happen.

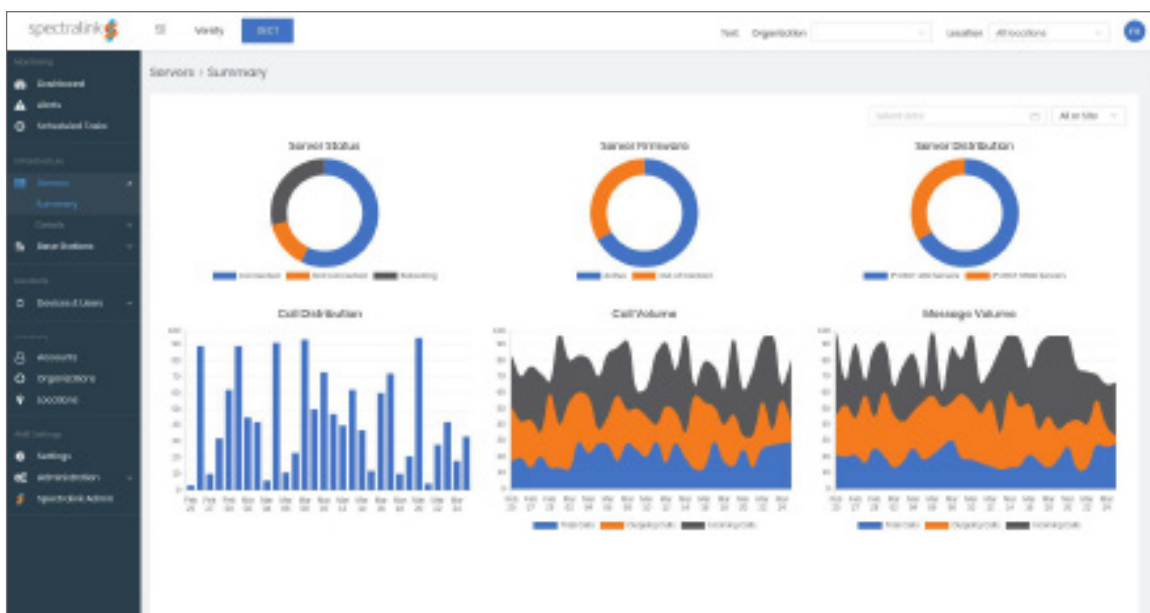

In today's mobile world it's hard to keep things simple and moving. More devices, more users, more applications. How do you manage it all? **AMIE Advanced** for IP-DECT empowers your team to keep your Spectralink DECT system running smoothly with fast deployment, centralized administration, and monitoring and alerting on system status.

The Main AMIE Analytics dashboard provides a full operational view of your Spectralink DECT System.

## Optimize DECT operations and focus on uptime with AMIE Advanced.

AMIE Advanced for IP-DECT provides centralized administration and control for servers, base stations, and handsets. It also gives a detailed look of the system's performance and alerts when areas need attention. AMIE Advanced for IP-DECT includes the AMIE for IP-DECT provisioning and analytics module.

Easily see server status, call distribution and volume.

## Increase productivity

Avoid disruption and downtime. Always know the status of your servers and base stations; including call volume and distribution.

Monitor and control handset users; edit and/or disable users, register users and see their latest activity.

Evaluate media resource loads for optimal network availability.

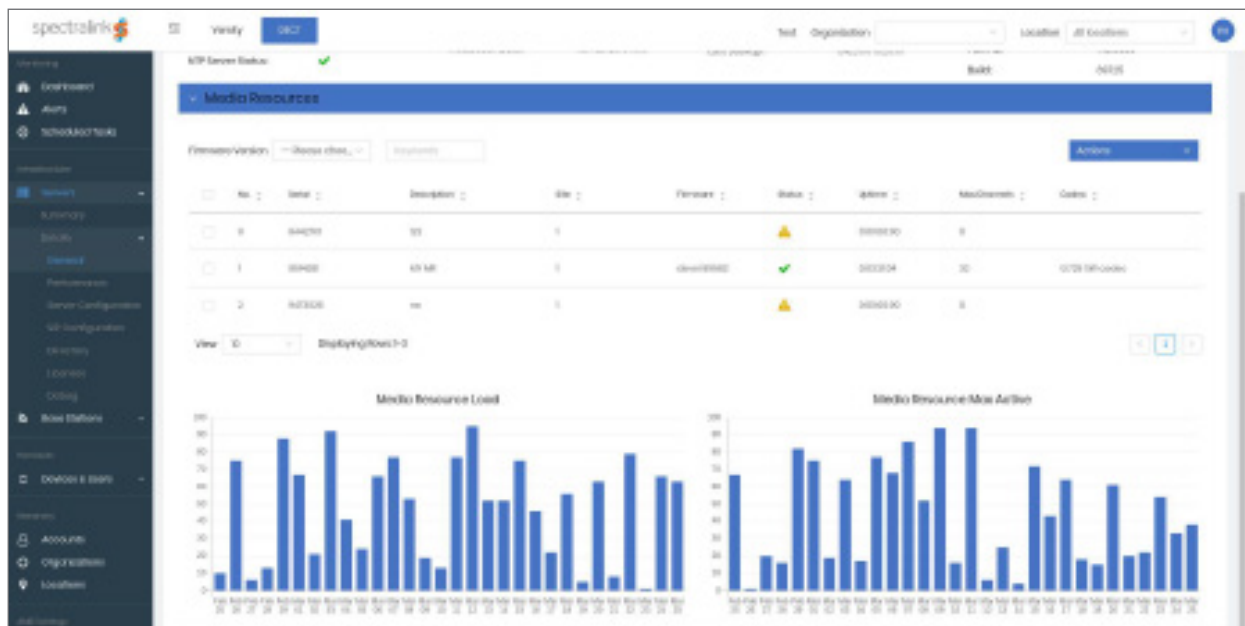

## Safeguard call quality

Support critical communications by monitoring user experience on the network and call volume data to ensure that the network is supporting the necessary load for optimal communications.

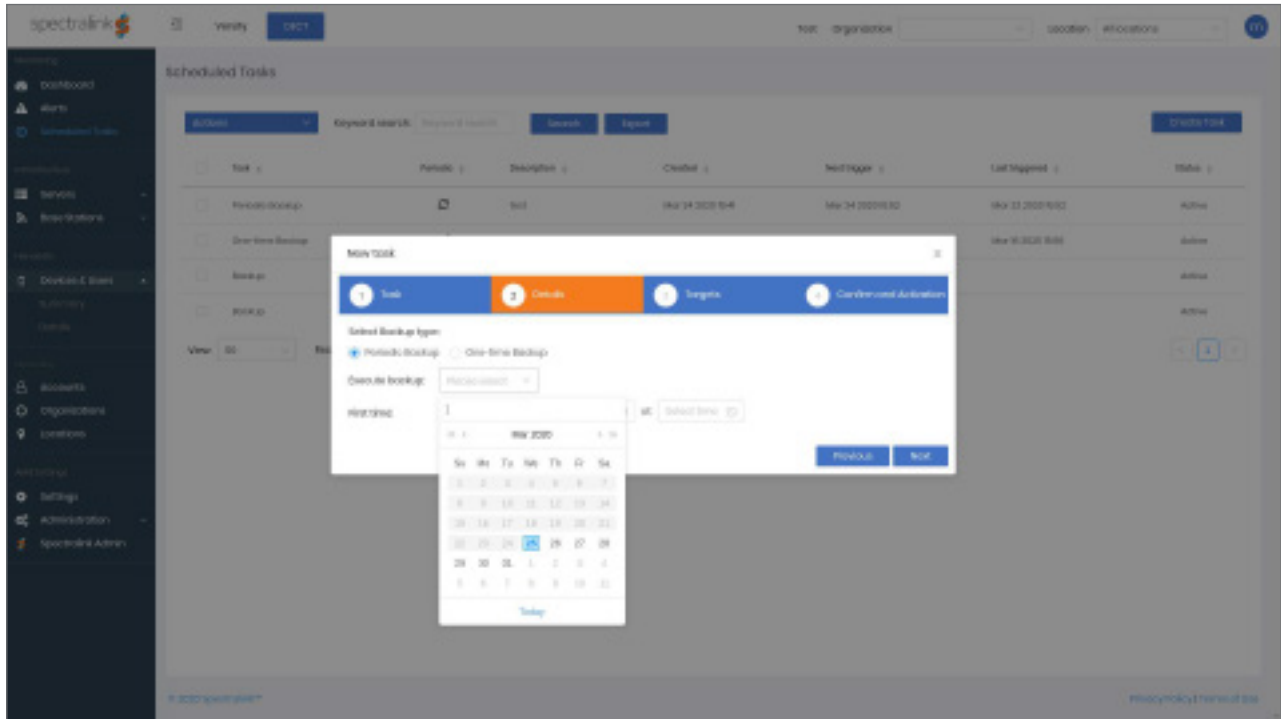

## CENTRALIZED CONFIGURATION AND MANAGEMENT

### Orchestrate control of all your DECT system components from one location

- Rollout new firmware for IP base stations and servers.
- Configure, backup and restore servers and base stations.
- Enable/disable handsets; register and delete users.
- Update handset software.
- Backup and restore entire site as part of disaster recovery.

View media resource loads to help troubleshoot DECT network issues.

Schedule backups and other administrative tasks to ensure that your hardware is up to date.
