

Enabling Mobile Workers

With RingCentral® Office

Spectralink integrates with RingCentral, a global cloud-based phone system, to support a modern and unified approach to your enterprise's digital transformation journey.

The Spectralink product portfolio seamlessly integrates with the RingCentral phone system to provide a secure and reliable communication solution to your workforce through enterprise-grade Wi-Fi and DECT mobile devices. Spectralink devices, known for providing industry-leading voice quality and durability, combined with the RingCentral platform create a robust solution that empowers mobile workers with access to the same tools as office and remote workers securely uniting voice, data, and people for more efficient collaboration. Spectralink devices are easy to implement and can be centrally managed by enterprise IT and Telecom Administrators through AMIE® (Advanced Mobile Intelligence for Enterprise), a cloud-based mobile analytics dashboard that completes your mobility solution.

Our partnership with RingCentral also provides interoperability with these and other leading cloud platforms:

Spectralink's Mobile Solutions Certified with RingCentral

Spectralink Versity 92 and Versity 95/96 Wi-Fi Enterprise Smartphones

Versity enterprise-grade smartphones are rugged all-in-one solutions that provide mobile workers with access to leading applications and voice communication anywhere the job takes them. RingCentral integrates with the native Versity SIP dialer application, BizPhone, providing unmatched voice quality to mobile workers and enabling more reliable communication and collaboration across the business.

Spectralink 84 Series Wi-Fi Feature Phone

The 84 Series is a durable and reliable feature phone with physical buttons and a simple menu interface that provides a dependable user experience in all environments. RingCentral integrates directly with the 84 Series SIP dialer providing a crystal-clear and reliable voice experience on the move. Designed for deskless workers across many industries, the 84 Series unites the most critical elements of workplace communications into a simple feature phone.

Spectralink Virtual/200/400/6500 IP-DECT Servers and 7000 Series DECT Handsets

The Spectralink DECT portfolio is a flexible and scalable solution that offers secure communication to on-site mobile workers. RingCentral integrates with the Spectralink DECT servers and handsets for dependable and crystal-clear voice communication across businesses in verticals such as manufacturing, retail, hospitality, and elderly care verticals.
