Versity 97 HDMI Docking Station

Unlock a Higher Level of Proficiency

Spectralink Versity 97 HDMI Docking Station

Managing a fragmented hardware environment leads to higher IT overhead, inefficient workflows that delay patient care, and increased security vulnerabilities that can impact hospital operations.

Incorporating the Versity 97 and the HDMI Docking Station into your mobile-centric workflow helps consolidate devices and reduce security risks by eliminating the need for redundant computer hardware.

Managing a hospital mobile communications system is complex. It's time to simplify.

Cost-Efficient IT Management

Lower IT costs by consolidating devices, minimizing endpoint management, and reducing the need for expensive laptops, desktop computers, and workstations on wheels.

Provide Seamless EHR/Application Access

Replace multiple logins/logouts and device switching with a single mobile-powered desktop experience that offers your clinicians an uninterrupted and richer patient care experience.

Secure, Compliant, and Convenient

Ensure secure, HIPAA-compliant access and use of mission-critical systems.

Easy to Deploy, Easy to Use

Provide a plug-and-play setup. By placing their Versity 97 into the HDMI docking station, your clinicians can start working on a larger screen instantly.

Let's talk about how Versity 97 HDMI Docking Station can work for you.
