

Spectralink Versity Smartphone Family in Healthcare

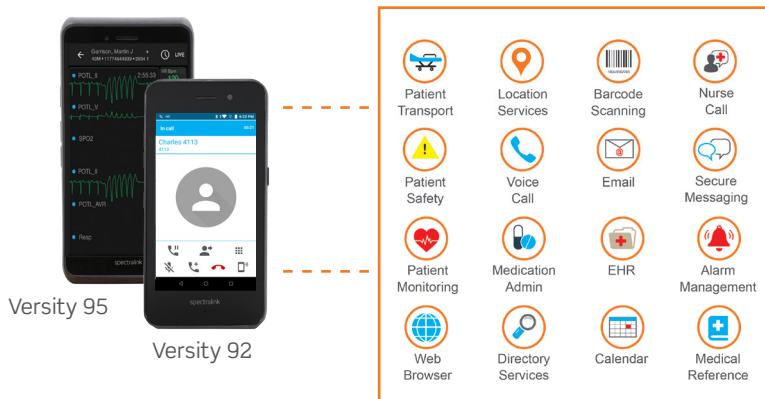

Deliver advanced patient care on the move

The Versity Smartphone Family addresses the critical communications, collaboration, care coordination, and documentation requirements of patient care teams, medical support staff, and non-clinical mobile workers.

Versity smartphones empower both clinicians and non-clinical staff to deliver better care.

Designed specifically for the rigors of demanding and stressful healthcare environments, Versity smartphones offer unmatched voice quality and secure, compliant data access throughout a healthcare facility. Versity integrates seamlessly with leading healthcare applications and innovation partners - helping to improve patient outcomes and experiences, optimize workflow efficiency and put caregivers back at the patient bedside - where they matter most.

Give health workers the mobility tools they need

- Crystal clear voice quality to
 - Hear orders the first time
 - Request assistance
 - Communicate seamlessly with patients and colleagues
- Voice and data that work as workers move about in rooms, in stairways, in elevators, and from floor to floor
- A lightweight device that won't weigh down a scrubs pocket
- Built-in scanner to scan medications, patient bracelets, barcodes, and other devices associated with the patient's medical records
- Receive patient or bed alarms and alerts immediately and respond or escalate appropriately
- A touch screen to see vital patient information and orders that can be used while they are wearing their gloves
- Effective management of tasks, patient workflows, and maintenance in a busy healthcare environment
- Keep both themselves and their charges safe in emergency situations
- A durable device that can withstand drops on the floor, liquid, and consistent cleaning with hospital-grade disinfectants

Make the conversation clear

Clinicians need to be heard wherever they are on the job. Lives depend on it. Yet the constraints of the hospital, the overhead alarms, can all get in the way of making a clear call.

Our Voice Quality Optimization (VQO), delivers superior voice quality through cutting-edge technology designed with years of expertise in the field. Our Versity devices feature a dedicated Wi-Fi antenna for call coverage and multiple optimally-placed microphones that cancel out the background noise and won't get clogged with sweat or makeup by busy clinicians constantly on the move.

Facilitate clinical safety

Versity smartphones enable caregivers to request resources and assistance quickly in an emergency. Automated alerting, including details of the patient situation, facilitates timely, informed responses and effective triage.

Spectralink SAFE features also protects clinicians with access to security with the press of the red alarm button at the top of the device.

Device management and insights

Healthcare, more than any other industry, needs to provide a continuum of care: devices need to always be up and working properly for staff to take care of patients. AMIE®, our cloud-based mobile analytics dashboard for IT and telecommunications administrators, provides valuable insight into device and network health, supporting mission-critical mobility so that your clinical support staff has the peace of mind to know that their Versity device is going to work and do what it is supposed to do: enable information and communication at their fingertips anywhere on the job for optimal patient care.

Spectralink Versity devices:

Improve patient care

- Coordinate patient care across all care team members
- Provide real-time access to patient information such as vital signs, dietary needs, medication information, and patient pain assessment scores
- Enable HIPAA-compliant secure text messages

Increase patient satisfaction

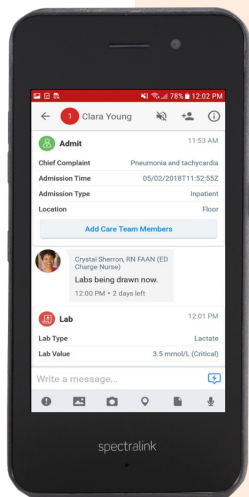

- Update patient information at the point of care
- Respond faster and more efficiently to patient needs and alarms
- Access lab results for faster diagnostics and care
- Streamline workflows to allow for more time at the bedside

Optimize workflows

- Get the right information instantly with access to clinical applications and systems
- Improve staff visibility and connectivity
- Centralized alerts and notifications to reduce alarm fatigue
- Programmable buttons for quick access to most used applications

Alarm button (red)

Versity 92

Put documentation, notification, communication, and information in the hands of caregivers with Versity 92.

Spectralink's Versity 92 Series delivers voice-critical communications and leading workflow applications in a sleek, lightweight, durable, and cost-effective enterprise-grade smartphone. Its ideal for voice centric roles that also need access to applications for task-based workflows.

Features

- 4-inch touch screen display with Dragontrail™ glass
- Lightweight design made with medical-grade resin
- Durable without a bulky, expensive protective case
- IP65 rated; withstands drops and liquids
- Holds up to hospital-grade cleaners and UV sanitization that degrade competitive/consumer devices
- Can be used while wearing latex gloves
- Optional integrated 1D/2D scanner
- Warm-swappable, separately chargeable battery

Versity 95

Take point of care workflows and team collaboration to the next level with the Versity 95 featuring a large screen, powerful processor, multiple microphones, and hot-swappable battery.

This best-in-class, full-featured, easy-to-use premium enterprise smartphone is the perfect solution for voice-critical, zero downtime, rugged 24x7 environments that demand superior power and application functionality. Ideal for heavy charting/EHR integration due to the large screen and advanced processing power.

Features

- 5.2-inch display with Gorilla™ glass
- Slim design medical-grade resin
- Durable without a bulky, expensive protective case
- Withstands drops onto hard surfaces, tumbles down the stairs, and submersion in water
- IP68 rated; dustproof, waterproof, flushproof
- Holds up to hospital-grade cleaners and UV sanitization that degrades competitive/consumer devices
- Can be used while wearing latex gloves
- Optional integrated 1D/2D scanner
- Hot-swappable battery

About Spectralink

As an award winner in mobile technology, Spectralink has been transforming the way our customers work and communicate for 30+ years. Through our determination to do extraordinary things, we enable mobile workforces and empower our customers and partners to explore what's next, what's possible. With our enterprise grade, best-in-class mobile solutions, we are with our customers wherever they work, however they need us. Our people, commitment to innovation and our passion are our foundation for success.
